

VIVIAN HAN-TAT *(she/her)*

I am a creative, photographer, and designer based in Edmonton, Canada. My work hovers between where our world and the digital lasso meet. Viewers are pulled in-between nostalgic in-real-life memories and surreal futures of the digital space.

With a background in architecture and design, I think between digital and physical mediums, and have honed my skills for story-telling and visual representation for over 8 years.

Skills are not used in isolation. With my experience in photography, graphic design, 3D render, and spatial design, the aim is to create complete experiences and tell the most particular of stories. Recently my projects have explored themes of Asian identity, as well as, “other worlds” - whether niche and foreign to myself, or imaginary.

Being chronically online keeps me on the pulse and in the room. As the internet opens up opportunities to seemingly everywhere at once, my creative energy reflects on the duality of growing with the digital world and carving space in our IRL communities.
